FIELD: LANGUAGE AND COMMUNICATION

SUBJECT: ENGLISH

CLASS: XI-C

Curricular Project Topic: A deep insight into the customs and traditions of Britain

Aim: Exploring English culture and traditions

Prepared by: ERTON SHKULLAKU

Project objectives related to the competencies of the English subject:

Vocabulary Competencies: 1- The use and enrichment of vocabulary with phrases related to British traditions, social influences, and future innovations.
2- Discussion of topics such as "history," "geographical position," and "characteristics of England, Scotland, Wales, and Northern Ireland."

Reading skills: 1- Summary of information on the evolution of traditions and culture, and their impact on everyday life.

2- Research in sources such as books, websites, and scientific articles to become familiar with the culture and traditions of a kingdom through the centuries, its role in history, and possible changes in the future.

Writing Skills: 1- Planning and organizing paragraphs for group presentations.2- Drafting essays, surveys, and promotional articles that address English traditions and culture.3- Creating materials such as posters, infographics, and blogs to present the group's findings.

Communication Skills: 1- Effective presentation using verbal communication and body language.
2- Convincing peers about the importance of the information presented. 3- Discussion and defense of opinions during debates and question-and-answer sessions.

Listening Skills: 1- Integration of comments and suggestions from peers during discussions. 2- Application of learned examples in real-life situations related to technology.

Grammar Skills: 1- Correct use of tenses such as the present simple, past simple, present perfect, and future forms.2- Practicing modal verbs to express opinions and propose future scenarios.

Results of Learning Field Competencies Referring to the Topic

STUDENT :

- Expresses through a form of communication on a specific topic in a cultural material and highlights the main issues raised in the material (presentation);
- Presents the project, developed individually and in groups, using information technology and other technologies effectively.

Competence of Thinking

STUDENT :

- Presents, in various forms of expression, the method of collecting, selecting, and classifying information for the chosen topic, and provides arguments for current developments related to the respective topic;
- Compares at least three different sources of information on the topic, argues accuracy and circumstances, identifies similarities and differences based on previously defined criteria, and presents the main findings to others in various expressive forms, using information technology;

Competence of Learning

STUDENT:

- Effectively uses prior experiences when solving different situations in everyday life or while completing tasks in the English subject, discusses and shares experiences with others about the most practical ways of using prior experiences to achieve new knowledge;
- Poses questions and expresses structured ideas for solving a specific problem or task, summarizes at least two actions taken which determine the further direction of learning for the chosen topic or problem;
- Successfully prepares a summary of the personal portfolio, for the purpose of self-assessment and personal progress in the field of cultural knowledge, highlighting at the end of the summary several issues that demonstrate personal advancement and several essential needs for further improvement;
- "Independently uses the instructions provided in information sources to carry out an action, activity, task, or to solve a required problem, evaluates personal performance and the achieved result by referring to the initial objectives (e.g., information sources in books, magazines, encyclopedias, the internet, maps, charts, sketches, etc.).

Competence for Life, Entrepreneurship, and Environment

STUDENT:

- Prepares, presents, leads, and participates in a citizen information campaign to promote knowledge of the history, traditions, and culture of a country, based on clearly defined expected outcomes (e.g., an awareness campaign for the protection of traditions, etc.);
- Researches and analyzes different forms of entrepreneurship for career orientation opportunities, as well as for contributing to the good of the community;
- Demonstrates organizational skills in individual and team work through real situations in specific project tasks or in activities for life, work, and environment, by managing individual and group potential as well as time, risks, and the available budget;
- Prepares a well-managed project with clear phases (individually or in groups), exchanging, consulting, and informing others, while identifying and evaluating human, material, and financial resources in accordance with the expected results;

Personal Competence

STUDENT :

- Analyzes personal strengths and weaknesses by identifying measures through which one aims to support personal advancement in areas of strength, and measures through which one aims to improve personal weaknesses, with particular care for the preservation of cultural heritage and traditions

Civic Competence

STUDENT :

- Demonstrates examples of democratic participation and leads different forms of discussion on citizens' involvement in democratic decision-making processes at various levels (e.g., in the family, at school, in the community, locally, and nationally), showing tolerance and respect for the questions and comments of others;
- Demonstrates concrete examples of protecting the history, traditions, and culture of Great Britain and of human-created heritage in everyday life activities at home, in class, at school, and in the community, and proposes alternatives for how all citizens can contribute in different ways to zealously preserve the customs and traditions of the country.
- Discusses with others or through another form of expression, presents personal interest in public, social, historical, and natural issues, and offers proposals for solving a problem.

Digital Competence

THE STUDENT USES TECHNOLOGY TO FOSTER INNOVATION:

- Uses digital tools and information environments, including remote communications, for the development of knowledge;
- Finds, organizes, analyzes, processes, and uses information from a variety of different sources;
- Uses digital tools to process, create, implement, and demonstrate learning topics through filmed or animated visualizations.

Project Participant: Students of grade XI^{C} ; Englis teacher/ Teachers of the school/ IT teacher

METHODS USED: Work in groups, individual work, discussion network, research, free writing (essays).

MATERIALS: video projectors, internet informations, photo album, canvas, work sheet, leaflet, cd with documentaires about Britain.

Duration period: October-April

Duration of the Project: 6 classes x 45 minutes

Location: At school

PROJECT BUDGET: SELF-FINANCING

Project goal: Learning about the traditions and culture of Britain over the centuries.

Learning outcomes: At the end of the project, the student will be able to:

1- Research information about the history, geographical position, and characteristics of England, Scotland, Wales and Northern Ireland.

2- Explain through information the customs, traditions, famous people, and writers in the respective countries.

3- Analyze the development that Britain has undergone through the centuries XVI, XVII, XVIII, XIX, XX.

Subtopics:

1. Historical developments in Britain during the XVI, XVII, XVIII, XIX, XX.
2. Traditions and customs in Britain during the XVI, XVII, XVIII, XIX, XX.
3. Economic, cultural, and social developments and the changes that Great Britain has undergone.

Teaching strategies

- **Research skills:** The use of online databases, scientific journals, and government reports for gathering information.
- **Cooperative learning:** Groups will encourage teamwork and peer learning.
- **Writing skills:** Comments, descriptions, reviews, stories, editing, proofreading..
- **Critical thinkging:** Analyzing the impact of preserving traditions in different fields, identifying problems, and proposing solutions.
- **Speaking skills:** Description of places, comparison of places, presentation, agreement, discussion.
- **Presentation skills:** Each group will present its findings using slide presentations, infographics, and oral communication.

- **Books about Britains geography and history:**
- **Interviews, questionaires, school books of students.**
- **Presentation tools:**
  - **Interviews, surveys, posters, internet pages**
  - **PowerPoint presenttations/Canva**
  - **Videos**
  - **Prototypes and infographics**

- **Short description of the project**

  This project explores the changes that Britain has undergone over the centuries, its customs, traditions, geographical extent, and history through the ages. Students will analyze how the economy, colonization, and the expansion of British power across the world have developed. The causes and consequences of the changes that Great Britain has undergone and the social interactions. Through research, discussions, and creative presentations, they will critically demonstrate both the positive and negative aspects that occurred in the XVI, XVII, XVIII, XIX, XX centuries. The project encourages collaboration, critical thinking, and education on preserving traditions and customs in our own country as well.

Project timeline:

The project will be carried out in three phases:

- **Phase 1** (Lesson hours 1, 2)
- **Phase 2** (Lesson hours 3, 4)
- **Phase 3** (Lesson hours 5,6)

Lesson hour 1: Entry & Team formation

- Picking the projects topic.
- The division of students into groups.
- Assigning a research task to each group.
- Assigning tasks to each student within the group.

Lesson hour 2: Learning Outcomes and Importance of the Project

- Defining the learning outcomes for each skill.
- Discussion on the importance of the chosen project.

Lesson hour 3: Preparation for Gathering of Data

- Preparation of instruments (questionnaires, interviews) for collecting information in the field

Lesson hour 4: Gathering Data

- Data collection from interviews and other sources of information
- Preparation of instruments (questionnaires, interviews) for collecting information in the field
- Processing the collected data
- Class discussion on students' preliminary results

Lesson hour 5: Presantation and Evaluation

- Presentation of the prepared materials
- Assessment of group work and the individual contribution of each student
- Reflection on the lessons learned and possible improvements.

Lesson hour 6: Final presentation and Evaluation

- Presentation of the final product/report.
- Assessment of group work and individual performance

Group 1 : The 16th century in Britain, " The Golden age":

Student 1: The history of Great Britain

Student 2. Art and culture in Britain in the years 1500-1600

Student 3. Interesting facts about the XVI century

Student 4. Tradition and wear in this century

Student 5. Social hierarchy and rites of life

As sources of information for these issues, the internet, books, magazines, documentaries, etc. should be used.

Group 2 : The 17th century in Britain, " The age of conflict":

Student 1. Geographic position and caracteristic of England, Scotland, Wales, Northern Ireland

Student 2 The natural features of Britain

Student 3 Royal family, its influence and symbols

Student 4 The importance of tea in Britain, food and their consumption according to social hierarchy

Student 5 The development of the economy, literature, and art

Student 6 Interesting facts about the XVII century

Group 3. The 18th century in Britain, " The age of enlightenment" :

Student 1. The British Empire

Student 2. The touristic and coulture development in Britain

Student 3. Art and culture in Britain in the XVIII century

Student 4. Politics, government, and monarchy in the 18th century

Student 5. Industry and the revolution

Student 6. Everyday life and sociality

Note: every piece of information, idea, or discussion is accompanied by a photo and an explanation.

Some students write essays on the topic: 'I want to study in England.' 'England, the country of my dreams.

Group 4. The 19th century in Britain, " The Victorian era":

Student 1. Queen Victoria and her empire

Student 2. The causes of industrial and social development in the Victorian era

Student 3. Social life, the movement of people

Student 4. Creating a chart about social and urban movements

Student 5. Fashion of clothing during the XIX century

Student 6. Interesting facts about the XIX century

Group 5. The 20th century in Britain, " The Modern age":

Student 1. The importance of the tea tradition in Britain

Student 2. Fashion of clothing during the XX century

Student 3. Creating a chart on the shifts of kingdoms across centuries, the persistence of the tea tradition, and tourism in Britain

Student 4. Ethics and social norms

Student 5. Interesting facts about the XX century

THE DEVELOPMENT OF ACTIVITY

PREPARATION

The phases through which the project passes

Phase 1	Phase 2	Phase 3
2 hours of 45 minutes each	2 hours of 45 minutes each	2 hours of 45 minutes each

1. The project conception phase

Phase I: Duration: 2 teaching hours

Topic: Choosing the topic, dividing the groups, and assigning tasks to each group.

Students: 1. Divide into working groups and assign the tasks.

2. Group leaders are chosen and ideas for the work are proposed.

3. The tasks are left for the next meeting.

4. They search in different sources for information on the assigned topics.

5. They apply the strategies of the process of collecting and writing the material.

Methods: They use brainstorming, group work, discussion webs, and graphic discussions.

Materials: Blackboard, chalk, online informations, published studies.

The development of the lesson:

First step: Observation and discussion.

The teacher, in cooperation with the students, chooses the topic.

Second step: Brainstorming.

The information provided by the students is written on the blackboard and supplemented by the teacher.

Third step: Group work.

The students are divided into groups according to their abilities and preferences.

The group leader is chosen and the tasks are divided among each member.

The students are guided on how to make the action plan.

Fourth step: Discussion network

Defining the objectives and results

Setting the deadlines.

Task: Search for materials, gather information, and process the information.

Evaluation of the lesson

Observations, notes, and measurements of the students' work according to learning outcomes.

The first and second hour: Presentation of the topic and division of work groups, selection of the leaders of each group.

Scientific content	Aesthetic presentation	Presentation and time	In total
6 points	2 points	2 points	10 points

Phase II: The material for each issue and sub-issue is reflected, discussed, and selected.

Duration: 2 teaching hours

Topic: Monitoring the work done by the students.

Students:

1. They report on the progress of the project work.

2. They discuss the project and the materials so far.

3. Guidance of the study work for drafting and presenting the final project.

Methods: Interactive dialogue, detailed observation, and discussion.

Materials: Computer, USB with works of each group/email.

Development of the lesson:

First step: Detailed observation

Nxënësit raportojnë mbi ecurinë e projektit

Second step: They discuss the observations.

After each report, students discuss or give opinions and suggestions to improve the work.

Task: Review the material and take into account the comments made in the previous phase.

Evaluation of the lesson

Observations, notes, and measurements of students' work according to learning outcomes.

Scientific content	Aesthetic presentation	Presentation and time	In total
6 points	2 points	2 points	10 points

The phase of presenting the project.

Duration 2 lesson hours.

Fifth hour: After the materials are completed, the presentation takes place; during the stages of the project, discussions are held also in free time, and cross-curricular topics are included to raise students' awareness about protecting the customs, traditions, and culture of the country

Sixth hour: At the end, each group and student is evaluated individually for the information found, the way the work was carried out and the collaboration, as well as the achievement of results.

Topic: Presentation of the work by groups.

Students:

1. List the features of each group's work.

2. They present the project according to the respective groups and individually.

Methods: Dialogue, detailed observation, discussion, synthesis.

Materials: Computer, USB, email.

Development of the lesson.

First step: Detailed observation.

Students present the work on the monitor through a final report.

During the presentation, everyone takes notes for remarks or suggestions.

Second step: Discussion about the observations.

After each work, students discuss or give opinions and suggestions.

Third step: Selection.

Selection of the best works and comparison with the conclusions and the works developed in class.

Assessment criteria: - Language used and project structure.

- Scientific accuracy of the information presented.

- Knowledge of the material and debate on positions within the group.

- Indicative, explanatory, commenting, and analytical ability.

- Accuracy of the conclusions drawn.

- On-time submission of the project.

- Presentation and group work.

Evaluation of the lesson

Observations, notes, measurements on the student's work according to learning outcomes.

Scientific content	Paraqitja estetike	Presentation and time	In total
6 points	2 points	2 points	10 points

Present in this project: students, school teachers, and other guests.

Final products:

- **Web pages " https://erton shkullaku.github.io/projects /:** Focuses on technology, for the preservation and archiving of school projects.
- **Infographic:** Based on questionnaires conducted with the community and the school's students.
- **Awareness-raising brochure:** It informs students about the importance of traditions and culture, their protection, the changes they undergo, and the impact they have on different societies.
- **Peer presentations and observations:** Each group presents its work, showing findings and results. Students actively observe and take structured notes on:

- The accuracy and relevance of the content
- The effectiveness of delivery (clarity, confidence)
- The use of visual and interactive elements.

- **Group work evaluation:** Students and the teacher analyze each group's performance based on clear criteria, such as:

- The depth of analysis
- Presentation skills
- Creativity and engagement.

Lesson organization:

- **Presentation (Group work):** Students present their projects as a team, with the group leader facilitating the flow. Each member explains their contribution and knowledge. The group uses prepared visual tools (e.g., slides, posters, prototypes) to enhance the presentation and engage the audience.
- **Practice (Detailed observation):** Students present their findings, while the audience observes, takes notes on the key points, and prepares constructive evaluations. Encouraging active engagement with follow-up questions and discussions on the presented topics.
- **Product (Work assessment):** Students showcase their project artifacts (drawings, models, surveys) for evaluation by the class. At the end of the session, students participate in a peer-evaluation process to discuss which project best fulfilled the defined criteria. The teacher and peers provide feedback on the strengths and areas for improvement.
- **Sharing feedback:** Peers and the teacher provide constructive feedback for each group, highlighting strengths and areas for improvement.
- **Follow-up activity: (Reflection):** I organize a class discussion or ask students to write a short reflection about their experience with the project.

Reflection questions:

- **What did you learn from this process?**
- **What would you do differently next time?**

- **How did this project help you develop new skills?**

Assessment:

Students are assessed throughout the project work to provide timely feedback and guide improvements. The emphasis is placed on:

1 **Process:**

- Participation in class discussions, group work, and research.
- Monitoring student engagement (idea exchange, asking questions, contribution to problem-solving).
- Ensuring that each student fulfills their role (e.g., researcher, designer, presenter).
- Observing how students handle disagreements and make collective decisions.

2 **Product:**

- The quality of the final presentation based on content, design, and delivery.
- Clarity, conciseness, and organization of information.
- The depth of analysis and presentation of the topic.
- Originality and aesthetics of visuals (posters, slides, interactive elements).
- Interaction with the audience (answering questions, encouraging participation).

3 **Peer Assessment:**

- The ability of students to critically evaluate each other's work and provide constructive feedback.
- Implementation of peer feedback for improving the project.
- Reflection on peer assessment and adapting the approach accordingly.

Assessment Tools:

- **Rubric:** Create a rubric with clear criteria and a rating scale (examples of criteria: depth of research, teamwork, creativity, accuracy of content, presentation skills).
- **Observation list:** Create a list for tracking participation, collaboration, and communication during the project process.
- **Comment Formats:** Provide structured forms for peer and teacher assessment, ensuring consistency in evaluation.
- **Self-assessment:** Allow students to complete a self-assessment form, reflecting on their contribution, challenges, and personal growth.

Expected results:

- Increasing awareness in preserving and inheriting culture and traditions.
- Improvement of critical thinking and research skills.
- Development of practical solutions for real challenges.

- Strengthening collaboration and communication skills.

Final grade: This project encourages students to explore history, culture, and traditions, fostering critical evaluation and innovative solutions for their preservation with dedication to showcasing origins, while effectively integrating social and civic competencies. In conclusion, they will have developed valuable skills in teamwork, research, content organization, presentation, and planning for the care of cultural heritage.

Conclusion: The integration of technology into our lives has brought extraordinary advancements, highlighting the way we communicate, learn, and work to care for and utilize every centimeter of the planet we live on. However, this project emphasizes the awareness that every citizen should have to protect the historical, cultural, touristic, and traditional heritage that leads to the development and values of a state.

Criteria for evaluating the project portfolio:

- **Accuracy and Relevance of Content**
- **Creativity in Presentation**
- **Group Work and Collaboration**
- **Use of Language (Grammar, Vocabulary, Clarity)**
- **Engagement and Persuasiveness during Presentations**
- **Self-assessment**

The project has a total of 30 points for evaluation.

First period 10 points

Second period 10 points

Third period 10 points

The project is part of the evaluation based on the student's final portfolio product.

Project evaluation according to the criteria

Periods	Criteria	Level 2	Level 3	Level 4
1st Period	Student structures questionnaires /interviews to meet the theme and data collection.	Student formulates questions that do not address the specific problem and data collection.	Student formulates questions that partially address the problem and enable data collection.	Student formulates questions tha fully address the problem and enable data collection.
		1 points	**3 points**	**4 points**
	Student identifies and uses diverse sources for information research.	Student uses different sources for information research.	Student identifies and uses various sources for information research without assessing their validity and reliability.	Student identifies and uses various sources for information research, evaluating their validit and reliability.
		1 points	**3 points**	**4 points**
	Student exchanges ideas and collaborates in groups.	Student joins the group but is not active in carrying out the task.	Student cooperates with the group only when requested by other members.	Student demonstrates readiness for task completion and shares ideas with others.
		1 point	**1 points**	**2 points**
Max points		**10 points**		
2nd Period	Student processes information collected based on data.	Student identifies required information and data to draw simple conclusions.	Student describes required information and data to draw conclusions based on the data.	Student analyzes and interprets collected information and data t draw conclusions and identify limitations.
		1 points	**3 points**	**4 points**
	Student organizes the draft product in fulfillment of the theme and solving the problem.	Student structures the report into issues that partially address the problem but does not provide a solution.	Student structures the report into issues that partially address the problem and provide partial solutions.	Student structures the report into issues that thoroughly address th problem and provide solutions.
		1 points	**3 points**	**4 points**
	Student exchanges ideas and collaborates in group	Student joins the group but is not active in carrying out the task.	Student cooperates with the group only when requested by other members.	Student demonstrates readiness for task completion and shares ideas with others.
		1 point	**1 points**	**2 points**
Max points		**10 points**		

3rd Period	Student deals with the topic in order to solve the problem.	Student identifies solutions to the current issue without developing into the potential consequences of the proposed solution.	Student proposes solutions to the current required issue and identifies some of the possible consequences of the proposed solution.	Student proposes solutions to th current issue and analyzes the possible consequences of the proposed solution.
		1 points	**3 points**	**4 points**
	Student presents information using appropriate language and vocabulary	Student organizes information with difficulty without tailoring it to the target audience.	Student organizes information without adapting it to the target audience and conveys it clearly; uses vocabulary and typical terminology.	Student organizes information, adapts it to the target audience and conveys it clearly; uses typical vocabulary and terminology.
		1 points	**3 points**	**4 points**
	Student exchanges ideas and collaborates in a group for the presentation of the final product	Student joins the group but is not active in carrying out the task.	Student cooperates with the group only when requested by other members.	Student demonstrates readiness for task completion and shares ideas with others.
		1 point	**1 points**	**2 points**
Max points		**10 points**		

Mark	4	5	6	7	8	9	10
Percent	25%	25% - 38%	39% - 51%	52% - 64%	65% - 77%	78% - 90%	91% -100%
Points	0 - 7	8 - 12	13 - 16	17 - 20	21 - 24	25 - 27	28 - 30

Students complete a self-assessment form reflecting on their contributions, challenges, and growth.

Name : Grade :	Assesment
1. I finished my task on time	Yes/No
2. I worked according to the given instructions	Yes/No
3. I exchanged my opinions, listened to my peers'thoughts, and assessed their ideas as well	Yes/No
4. I asked for help in difficult moments	Yes/No
5. I delivered my presentation within my group at a high level of accuracy.	Yes/No

What would I do better if I worked on this project again? :
